SCHOOL of PUBLIC HEALTH

# Overview

- HET, IDU, MSM: focus on last round
  - Overview of sample characteristics and types of data
  - Sample of analyses, focus on HIV
- Next steps

# HET: 2007 AND 2010

# HET overview

	Wave 1 July – Oct 2007	Wave 2 Sept – Dec 2010
Data collection method	Venue – based	Respondent Driven
Total recruited *	332	338
HIV prevalence	3.9%	6.3%
Prevalence unrecognized infection	83.3%	62.5%

\*Complete survey and HIV test

# Sample characteristics: HET1 and HET2

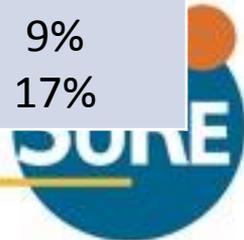

Characteristic		Wave 1 (n=332)	Wave 2 (n=386)
Gender	Male	54%	48%
	Female	46%	52%
Race/Ethnicity	Black, not Hispanic *	89%	95%
	White, not Hispanic	4%	2%
	Other	8%	3%
Age	18-24	24%	25%
	25-34	27%	26%
	35-44 *	33%	17%
	45 or older *	16%	32%
Education	Less than high school	37%	42%
	High school grad or GED	42%	44%
	More than high school *	20%	14%

$p < 0.05$

# Sample characteristics: HET1 and HET2

Characteristic		Wave 1 (n=332)	Wave 2 (n=386)
Employment	Full or part-time *	41%	25%
	Disabled for work *	11%	16%
	Unemployed *	36%	45%
Homelessness	Current *	10%	19%
	Past year *	24%	39%
Arrested in past year	Yes	29%	24%
Health insurance	Yes *	48%	63%
Healthcare provider in past year	Yes	78%	74%
Ever injection drug use	Yes	21%	22%
Drug use in past year	Injection drug use	13%	9%
	Crack use	22%	17%

# What counts as “sexual risk”? (HET1)

- Unprotected sex?
  - 84% report any unprotected vaginal or anal sex in past year
- Type of partner?
  - 72% report unprotected sex with only main partners
  - 38% report unprotected sex with casual or exchange partners

# Unprotected intercourse by STD history

	No STD	Any STD	<i>p</i> -value
<b>Comparing all groups</b>			
No unprotected sex	89%	11%	0.01
With main partners only	93%	7%	
With casual/exchange partners only	82%	18%	
<b>Comparing casual/exchange to main</b>			
With main partners only	93%	7%	0.003
With casual/exchange partners only	82%	18%	
<b>Comparing main to no unprotected sex</b>			
No unprotected sex	89%	11%	0.37
With main partners only	93%	7%	

# Research question

- Reported unprotected sex with casual or exchange partners (HET1): 38%
  - What are the associated socio-demographic characteristics?
  - What are the associated sexual behaviors?
  - What are other associated risks?

# Characteristics associated with unprotected sex with casual or exchange partners: Demographics

Characteristic		Total # (n=301)	Unprotected % (n=115)	Prevalence Ratio
Current homelessness	Yes	27	63%	1.8 *
High school education	Yes	192	35%	-
Race/ethnicity	African-Amer	271	37%	-
Age	18-24	80	21%	Ref.
	25-33	77	44%	2.0 *
	34-41	71	48%	2.3 *
	42-50	73	41%	1.9 *
Gender	Male	161	44%	1.4 *
Marital status	Married/living	34	32%	-
Living below poverty level	Yes	190	37%	-
Healthcare past year	Yes	238	35%	0.69 *
Health insurance status	No insurance	156	41%	-
Arrested/ booked past year	Yes	89	49%	1.5 *

\* $p < 0.05$

# Characteristics associated with unprotected sex with casual or exchange partners: Sex and HIV

Characteristic		Total # (n=301)	Unprotected % (n=115)	Prev. Ratio
Number of opposite sex partners	1	99	9%	Ref.
	2	70	34%	3.8 *
	3	47	47%	5.2 *
	4 or more	85	71%	7.8 *
Past year, any sex with:	Same sex partners	20	65%	1.8 *
	Concurrent partners	178	57%	5.0 *
Substance use in past year	Injection drug use	36	58%	1.6 *
	Non-injection drug use	173	46%	1.7 *
	Binge drinking (past mo)	100	48%	1.4 *
Ever told had STD	Yes	37	60%	1.7 *
HIV status	Positive	10	50%	-
Ever HIV test	Yes	255	37%	-
HIV test in past 2 years	Yes	190	36%	-

# Characteristics associated with unprotected sex with casual or exchange partners: Multivariate

Characteristic		Total # (n=301)	Unprot. % (n=115)	Prev. Ratio	Adj. P. R.
Currently homeless	Yes	27	63%	1.8 *	1.2 *
Age	18-24	80	21%	Ref.	Ref.
	25-33	77	44%	2.0 *	1.6 *
	34-41	71	48%	2.3 *	1.9 *
	42-50	73	41%	1.9 *	2.2 *
Number of opposite sex partners	1	99	9%	Ref.	Ref.
	2	70	34%	3.8 *	-
	3	47	47%	5.2 *	-
	4 or more	85	71%	7.8 *	3.5 *
Concurrent sex partners	Yes	178	57%	5.0 *	2.1 *
Any binge drinking past month	Yes	100	48	1.4 *	1.2 *
Ever told by physician had STD	Yes	37	60%	1.7 *	1.2 *

# Summary

- Limitations:
  - Cross-sectional, not causal
  - Voluntary enrollment
  - Self-report
  - Don't know if findings also true in HET2 sample (different characteristics)
- Prevention implications:
  - Associated with variety of potential risk behaviors
  - Homelessness and older age as co-factors

# **IDU: 2006 AND 2009**

# IDU overview

	Wave 1 Aug 2006 – Jan 2007	Wave 2 Sept – Dec 2009
Data collection method	Respondent Driven	Respondent Driven
Total IDU in past year recruited *	539	507
HIV prevalence	11.9%	16.2%
Prevalence unrecognized infection	50%	48%

\*Complete survey and HIV test

# Sample characteristics: IDU1 and IDU2

Characteristic		Wave 1 (n=539)	Wave 2 (n=507)
Gender	Male	61%	73%
	Female *	38%	27%
Race/Ethnicity	Black, not Hispanic *	54%	80%
	White, not Hispanic	41%	16%
	Other	6%	4%
Age	18-34	27%	14%
	35-44	42%	23%
	45 or older *	31%	64%
Education	Less than high school	48%	43%
	High school or more	52%	57%
Homelessness past year	Yes	58%	54%
Arrested in past year	Yes	47%	44%
Hepatitis C diagnosis	Yes *	29%	50%

\*  $p < 0.05$

# Sample characteristics: IDU1 and IDU2

Characteristic		Wave 1 (n=539)	Wave 2 (n=507)
Years since first IDU	10 or more *	61%	86%
Daily IDU	Yes *	79%	90%
Crack use past year	Yes	46%	43%
Used someone's needle past year	Yes *	53%	28%
Always used sterile needle past year	Yes	24%	25%
Used someone's cooker, cotton, water past year	Yes	64%	69%

# Research questions (IDU2)

- Characteristics associated with HIV infection
  - Total: 16.2%
  - RDS Adjusted: 13.2 (95% C.I.: 9.4, 16.8)
- Characteristics associated with unrecognized infection
  - Total: 8.3 (or 48% of HIV positive)
  - RDS Adjusted: 4.7 (2.7 – 7.8)

# Characteristics associated with HIV: socio-demographic (IDU2)

Characteristic		Total # (n=507)	HIV+ % (n=82)	Odds Ratio (RDS Adj.)
Gender	Male	370	18%	Ref
	Female	136	13%	-
Race/Ethnicity	Non-Hispanic White	83	7%	Ref
	Non-Hispanic Black	404	18%	-
	Other	20	10%	-
Age	18-34	69	6%	Ref
	35-44	116	15%	-
	> 45	322	19%	2.5 *
Education	At least high school	287	15%	0.3 *
Homeless past year	Yes	274	13%	-
Arrested past year	Yes	223	14%	-
Any STI past year	Yes	33	15%	-
Diagnosed with HCV	Yes	255	18%	2.2 *

# Characteristics associated with HIV: drug and sex behaviors (IDU2)

Characteristic		Total # (n=507)	HIV+ % (n=82)	Odds Ratio (RDS Adj.)
Years since first injection	Less than 10	70	4%	Ref.
	10 or more	437	18%	10.9 *
Daily injection drug use	Yes	454	17%	-
Crack use past year	Yes	218	12%	-
Used anyone's needle past year	Yes	144	13%	0.3 *
Share cooker, cotton, water past year	Yes	351	16%	-
Number sex partners past year	0	70	29%	Ref
	1	199	18%	0.5 *
	2 or more	230	11%	-
Any unprotected sex past year	Yes	349	10%	0.3 *
Last sex with HIV+ partner	Yes	12	3%	5.3 *

# Characteristics associated with HIV (IDU2)

Characteristic		Total # (n=507)	HIV+ % (n=82)	Odds Ratio (RDS Adj.)	Adj. Odds Ratio
Age	18-34	69	6%	Ref	Ref
	35-44	116	15%	-	-
	> 45	322	19%	2.5 *	-
Years since first IDU	10 or more	437	18%	10.9 *	7.0 *
Education	At least h.s.	287	15%	0.3 *	0.2 *
Diagnosed with HCV	Yes	255	18%	2.2 *	-
Used anyone's needle	Yes	144	13%	0.3 *	0.4 *
Number sex partners past year	0	70	29%	Ref	Ref.
	1	199	18%	0.5 *	-
	2 or more	230	11%	-	-
Any unprotected sex	Yes	349	10%	0.3 *	0.2 *
Last sex with HIV+ partner	Yes	12	3%	5.3 *	6.6 *

# Characteristics associated with unrecognized HIV infection (IDU2)

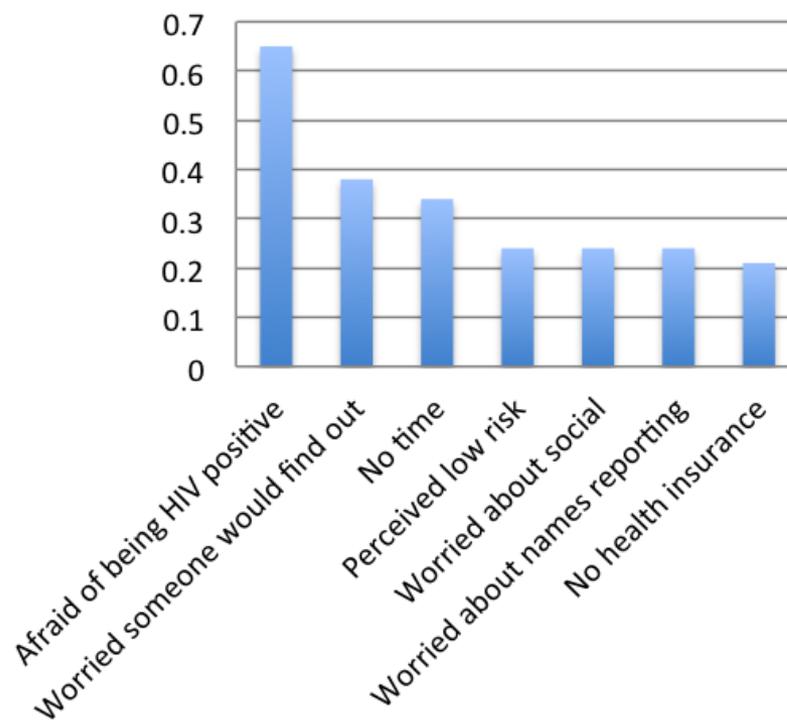

- 48% of HIV-positive
- No difference:
  - Socio-demographic characteristics
  - Drug use patterns
  - Injection risk behaviors

# HIV testing and unrecognized HIV infection

- Among those unaware of HIV positive status (n=42)
  - Ever test for HIV: 72%
  - Never test for HIV: 28%
- Among those ever tested for HIV (n=34)
  - Tested in past year: 36%
  - Not tested in past year: 64%

Reasons for not testing for HIV

# Summary

- Limitations:
  - Cross-sectional, not causal
  - Voluntary enrollment
  - Self-report
  - Comparison to IDU1 (Different characteristics)
- Prevention implications:
  - Low HIV risk behaviors among HIV-positive IDUs
  - Continued need for testing
  - Need to counter “fear of being positive”
  - Increase “always sterile needle”
  - Persistently high rates of cooker, cotton, water sharing
  - High arrest and homelessness

# MSM: 2004/2005 AND 2008

# MSM overview

	Wave 1 July – Oct 2007	Wave 2 Sept – Dec 2010
Data collection method	Venue – based	Venue – based
Total MSM in past year *	645	448
HIV prevalence	37.7%	37.5%
Prevalence unrecognized infection	58.4%	78.4%

\*Complete survey and HIV test

# Sample characteristics: MSM1 and MSM2

Characteristic		Wave 1 (n=645)	Wave 2 (n=448)
Race/Ethnicity	Black, not Hispanic *	63%	71%
	White, not Hispanic *	31%	23%
	Other	6%	5%
Age	18-24 *	24%	31%
	25-34	26%	30%
	35-44 *	31%	24%
	45 or older	18%	15%
Education	High school or less	49%	48%
	College or some college	45%	45%
	Graduate education	6%	6%
Sexual identity	Homosexual	63%	68%
	Bisexual	32%	30%
	Heterosexual or other *	5%	2%
Current homelessness	Yes *	3%	6%

\*  $p < 0.05$

# Sample characteristics: MSM1 and MSM2

Characteristic		Wave 1 (n=645)	Wave 2 (n=448)
Sex partners in past year	Men only *	67%	76%
	Men and women *	33%	24%
# male partners past year	1	26%	24%
	2-3 *	28%	34%
	4-8	23%	26%
	9 or more *	23%	16%
Unprotected anal sex past year	Yes *	53%	36%
Ever IDU	Yes *	17%	6%
Non-injection drugs past year	Yes *	49%	59%
Ever tested for HIV	Yes	87%	90%
Health insurance	None	36%	37%
	Public	23%	19%
	Private	41%	44%
Doctor's visit past year	Yes	77%	81%

# Research questions (MSM2)

- Characteristics associated with HIV infection
  - Total: 37.5%
- Characteristics associated with unrecognized infection
  - Total: 74.4% of HIV positive
- Racial disparities?

# Characteristics associated with HIV infection (MSM2): Socio-demographic

Characteristic		Total % (n=448)	HIV+ % (n=168)	Prevalence Ratio

# Summary

- Limitations:
  - Cross-sectional, not causal
  - Voluntary enrollment
  - Self-report
  - Comparison to MSM1 (different characteristics)
- Prevention implications:
  - Drastic need for innovative evidence-based prevention, especially among African-American men
  - Drastic need for targeted testing and link to care, especially among young men
  - Racial disparities not accounted for by behaviors
